Exercise 7a

Develop low-fidelity paper prototypes for a banking app and convert them into digital wireframes using Pencil Project

AIM:

The aim is to develop low-fidelity paper prototypes for a banking app and convert them into digital wireframes with Pencil Project.

PROCEDURE:

Tool Link: https://pencil.evolus.vn/

Step 1: Create Low-Fidelity Paper Prototypes

1. Define the Purpose and Features:
The banking app "TRUSTPAY" includes the following core features:

- User Login
- Dashboard
- Transaction History
- Money Transfer
- Bill Payment
- Balance Check

2. Sketch Basic Layouts:
Basic hand-drawn sketches were created for the following screens:

- Login Screen (Username & Password fields)
- Home/Dashboard Screen (Navigation buttons)
- Transaction History Screen

- Transfer Money Screen
- Bill Payment Screen
- Check balance screen

These sketches focused on layout, buttons, and input fields rather than detailed design.

3. Iterate and Refine:

The sketches were improved by:

- Aligning elements properly
- Making buttons clear and readable
- Ensuring simple and user-friendly navigation

Step 2: Convert to Digital Wireframes Using Pencil Project

1. Install Pencil Project:

Downloaded and installed from: https://pencil.evolus.vn/

2. Create a New Document:

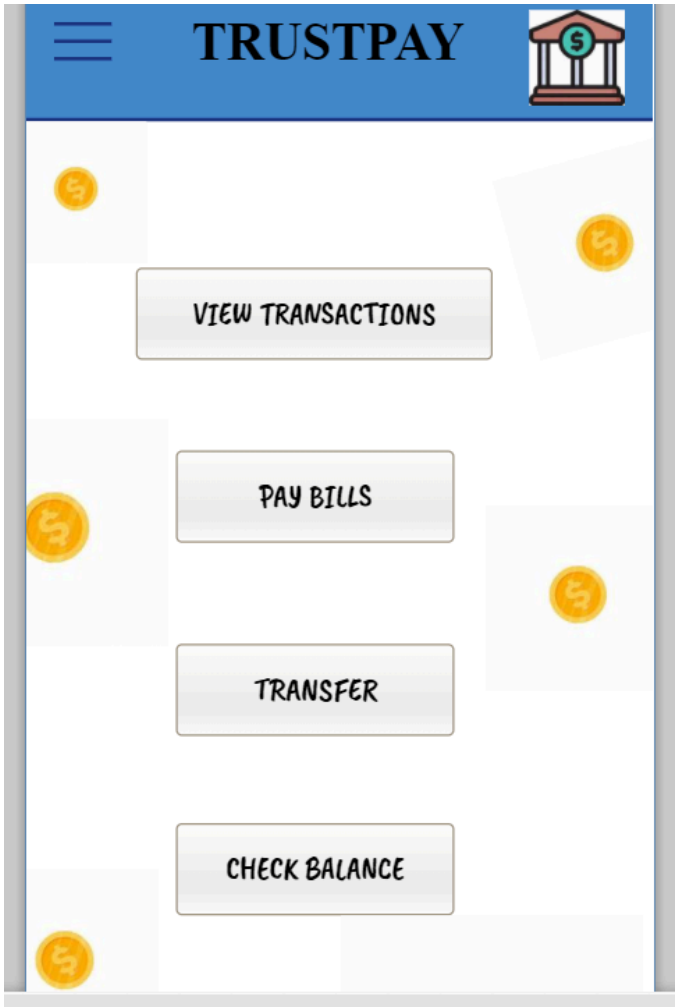
Opened Pencil Project and created a new wireframe document.

3. Add Screens:

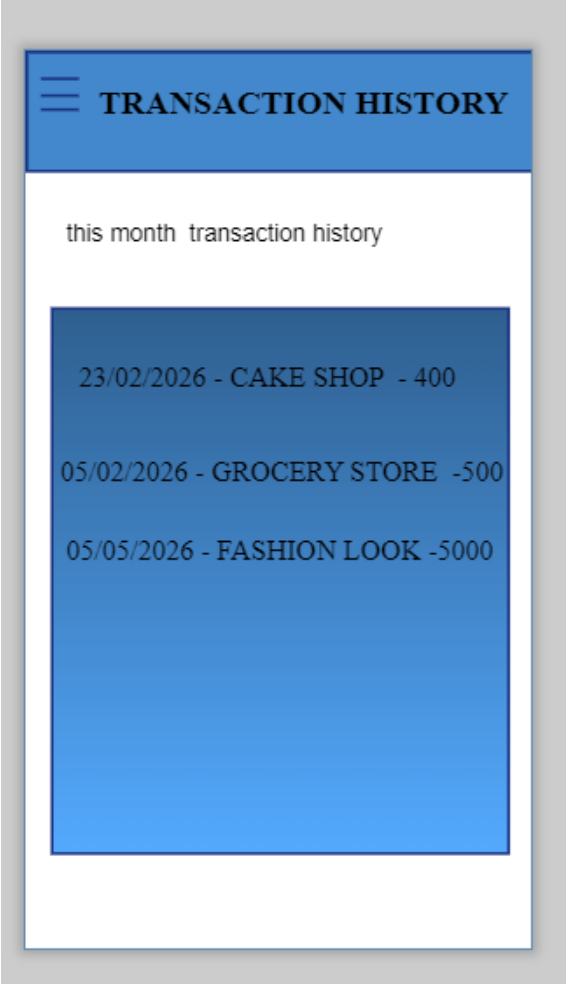
Separate pages were created for:

- Login Page

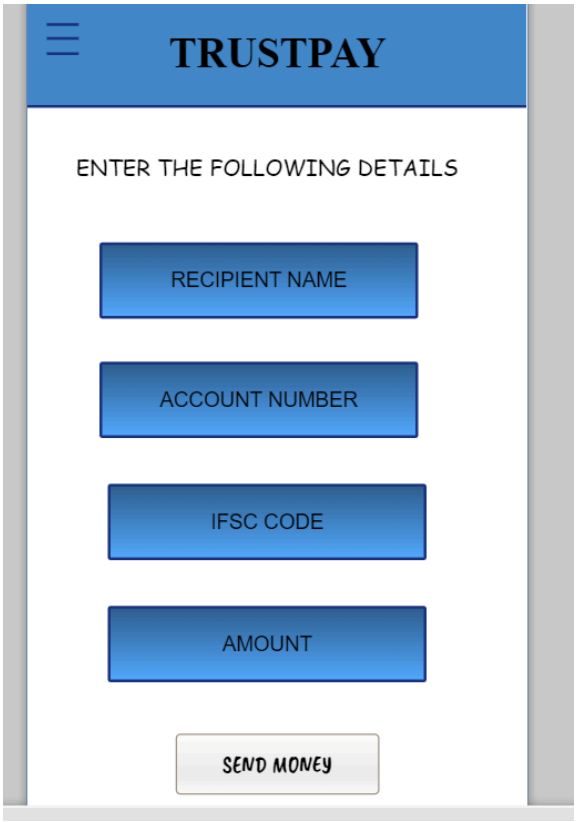
- Dashboard



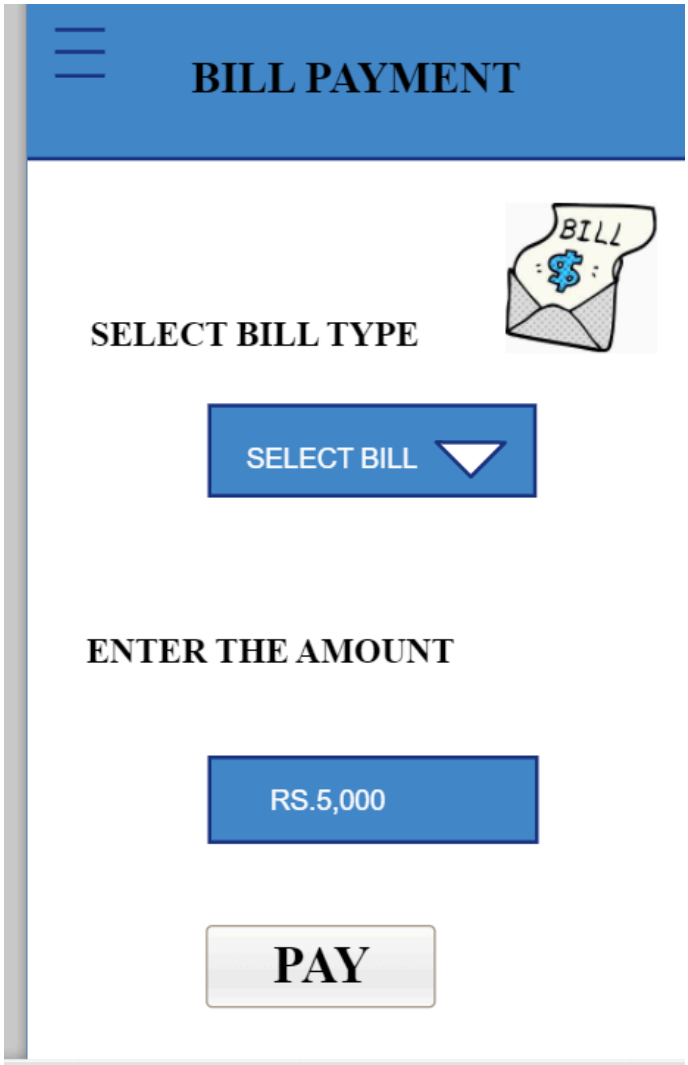
- Transaction History



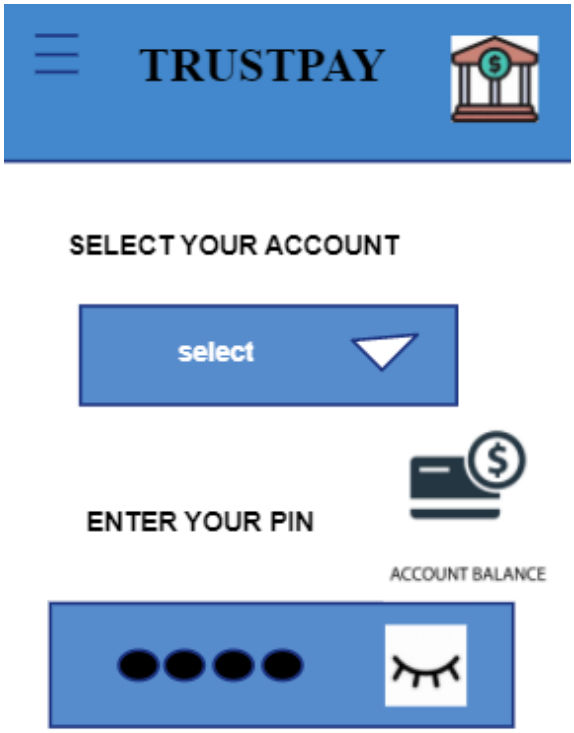
- Transfer Page



- Bill Payment Page



- Check balance page



4. Use Stencils and Shapes:

Used built-in tools to design:

- Text fields (Username, Password, Amount, etc.)
- Buttons (Login, Pay, Send Money)
- Icons (Menu, Bank, Money)

5. Organize and Align:

- Elements were aligned neatly
- Consistent spacing and layout maintained
- Simple color scheme used (blue and white theme)

6. Link Screens:

Navigation flow created:

- Login → Dashboard
- Dashboard → Transfer / Bill Payment / Transactions
- Buttons linked to respective pages

7. Add Annotations:

Annotations added to explain:

- Input fields
- Button functions
- Navigation flow

8. Export Wireframes:

Final wireframes exported as images (PNG format).
